PROFESSIONAL SUMMARY

B.Tech CSE student (CGPA 8.92/10) with hands-on experience building full-stack web applications using the MERN stack. Developed Smriti AI — a multilingual dementia screening platform with 4-module AI assessment, 3 role-based portals, 6 REST API endpoints, JWT + Firebase auth, 7-collection MongoDB schema, and 29/29 passing test cases — during 6-month industrial training. Targeting Full Stack, Frontend, and Software Engineering roles.

TECHNICAL SKILLS

Frontend: React.js 19, React Router v6, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Chart.js, Vite

Backend: Node.js, Express.js v5, PHP, REST API Design, JWT, Mongoose ODM, CORS

Databases: MongoDB Atlas, MySQL — schema design, CRUD, relational modelling

Auth/Cloud: Firebase Auth, JWT, Vercel, Netlify

AI/APIs: Anthropic Claude API, Gemini, ChatGPT, Antigravity, Cursor, Groq

Tools: Git, GitHub, VS Code

PROJECTS

Smriti AI — AI-Powered Dementia Screening Platform

[Live Link](#) | [GitHub](#)

(MERN Stack · Firebase · Gemini API · Open Router API · Groq API · JWT)

- Architected a **production-ready MERN stack healthcare platform** supporting cognitive screening in **10 Indian languages** across **3 role-based portals** (Caregiver, Doctor, Landing Page).
- Built a **4-module assessment engine** — Speech Recording (5–60 s), Spatial Pattern Memory (**3×3 grid**, 2,500 ms), **5-question** Memory MCQs, **5-item** Behavioural Self-Check — with dynamic question generation per session via the **Gemini API (Fallback API like Groq, Open Router)**.
- Implemented **dual-layer auth** (JWT 24 h + Firebase) protecting **100% of API routes** across **6 REST API endpoint groups**; designed a **7-collection MongoDB schema** with weighted AI risk scoring (speech 25%, spatial 25%, memory 30%, behaviour 20%).
- Achieved **29/29 passing test cases** across all modules; rendered analytics with **4 Chart.js visualisation types** (Radar, Line, Doughnut, Bar).

Libra Sphere — Library Management System

[Live Link](#) | [GitHub](#)

(PHP · MySQL · JavaScript · HTML/CSS)

- Built a **full-stack library system** managing **40+ book titles** and **280+ copy records** across **2 distinct user roles** (Admin and Student), each with separate permission sets and dedicated portal views.
- Designed a normalised **6-table MySQL schema** covering full borrowing lifecycle; built a **6-module admin portal** with session-based auth and server-side validation.

INDUSTRIAL TRAINING

Full Stack Developer Trainee — Alpha IT Managed Services Pvt. Ltd., Mohali — Jan 2026 – Jun 2026

- Engaged in **6-month industry training** building Smriti AI end-to-end; designed and implemented **6 REST API endpoint groups** across **7 MongoDB collections**, applied JWT/Firebase auth, and delivered across **4 development sprints** following the full SDLC.

EDUCATION

B.Tech — Computer Science & Engineering | **Universal Institute of Engineering & Technology, IKG PTU** — 2022–26 | **CGPA: 8.92/10**

Senior Secondary (XII) — CBSE | Don Bosco School — **91%**

Secondary (X) — CBSE | Don Bosco School — **92%**

CERTIFICATIONS

Front-End Web Development — Excellence Technology — *Jun–Sep 2024*

- Completed **3-month** hands-on front-end program; delivered **2 production-deployed portfolio projects** (Traveller Website and JS Mini Apps) applying responsive design and JavaScript fundamentals.
